

First Aid Course Outline

This Level Two course aims to train the participants with the basic principles and practices of First Aid, covering an extended array of medical conditions. Properly applied First Aid may be the difference between life and death, between rapid recovery and a long hospitalization, or between a temporary disability and a permanent injury. Therefore this course will provide a refresher of the Level One basic skills plus train how to attend to other injuries and medical conditions. The participants will gain more knowledge and confidence to be able to manage any first aid situation with minimal equipment, whether it is an illness or injury.

Course Overview

The course is based upon participant learning the following;

- Basic Principles and skills of First Aid refresher
- Various types of injuries with varying seriousness and first aid situations and how to attend to them
- Making that emergency call and knowing the chain of survival

The programme is given as a two day course plus in-class test. The course provides the material in the form of lectures and practical skill workshops and as such the participants are expected to actively participate in discussions, case studies and workshops.

Learning Objectives

The main learning objectives of the course are deepening the participant's knowledge and skills within the area. After completion of the course you should be able to;

- Demonstrate an extended knowledge of the Basic Principles of First Aid
- Knowledge of how to make that Emergency Call
- Demonstrate knowledge the Chain of Survival
